TO STUDY TIMBER CONSERVATION

To Insure Development of the Lumber
Industry.

The future development of the lumber
industry in this country lies in the direc-
tion of a closer utilization of forest
products. Both foresters and practical
lumbermen now agree on this point.

Just what can be done in this field is
well illustrated in the operations at the
mill of the Great Southern Lumber com-
pany, which has just resumed its plant at
Bogalusa, Louisiana, in response to an
increased demand for lumber after the
recent slump in business. This is
perhaps the largest sawmill in the United
States if not in the world, and is
capable of turning out the enormous
amount of 800,000 feet of sawn lumber
about measure per day. A reader can
get a fair idea of this quantity of lum-
ber when he is told that its output is
enough to build a little town of 40
houses, along with a good-sized church
and a schoolhouse, every day.

This company was quick to grasp the
significance of the rapid depletion of tim-
ber resources. Last year it began a co-
operative investigation in wood utiliza-
tion with the United States Forest
Service and arrangements have just been
completed for a general of the experi-
ments. The work will be along practical
lines and will be aimed to secure a closer
utilization of the products of the south-
ern lumber mills and at the same time
produce a margin of profit in excess of
that obtained by the methods which are
now practiced.

The field for work along this line is
broad. It is well known that the super-
ior grades of lumber are obtained from
old mature trees, provided they are not
weakened by decay or other influences.
In other words, a thousand feet board
measure of lumber, sawed from a tree
two feet in diameter, costs less and is
worth more than a thousand feet sawed
from a tree only eight inches in diameter.
Moreover, timber cut from young trees
usually contains a large amount of sap-
wood. If, ties, poles, etc., are cut from
such material, they will decay more
rapidly than if cut from heartwood. It
is not good business policy, however, in
a great many cases to saw the most val-
uable timber into commodities which are
relatively low in cost, such as ties and
poles. It is the intention, therefore, of
the company to find out just what
size and classes of timber can be best
utilized for the cheaper commodities
when given a preservative treatment.

To this end a careful study will be
made to ascertain the amount and value
of the products sawed from trees of
different sizes and just how each can be
best utilized so as to secure greatest
economy and profit. For example, can
a tree eight inches in diameter be best
utilized for ties or for flooring, and how
will the profits compare if treated with
those sold untreated? It seems reason-
able to suppose that the profits derived
from the sale of treated timber will ex-
ceed those from untreated timber.

Moreover, the greater use of chemically
preserved wood will undoubtedly result
in that wood giving a greater life in
service. Hence, the amount of timber cut
annually in the United States, simply
to replace that which has decayed, will
be materially decreased, and a further
conservation of forest resources will
result. Recent estimates by the Forest
Service place this reduction at 10 per
cent. of the total timber cut. The prac-
tical benefits of these experiments and
of the investigations for the utilization
of saw-mill waste are at once apparent.

\$100—REWARD—\$100.

The readers of this paper will be pleased to
learn that there is at least one disease that
science has been able to cure in all its
stages, and that is Catarrh. Hall's Catarrh
Cure, the only medicine that cures Catarrh
in all its stages, requires a constitutional treat-
ment. Catarrh is a constitutional disease,
acting directly upon the blood and mucous
surfaces of the system, thereby destroying the
constituent elements of the blood, and giving the
patient strength by building up the constitution
and assisting nature in doing its work. The
properties of this medicine are such that it
cures Catarrh in all its stages. Send for list of
testimonials.

ABOUT THE STATE

One barge has arrived in Burlington
from Quebec with a cargo of lumber for
the Shepard & Morse Lumber Co. Con-
siderable lumber is expected in Burling-
ton from Canadian ports before naviga-
tion closes, the low water having kept
the business at a standstill during Sep-
tember and October.

Capt. Daniel L. Tate, 3d U. S. Cav-
alry on detached service as professor
of military science and tactics of the
University of Vermont, has been ordered
to Fort Riley, Kan., for examination
for promotion to major. Capt. Tate
was in Vermont years ago when the old
Third Cavalry came to the then New
Port Ethan Allen.

R. W. Adams of Richford has received
word from the government authorities
at Washington that his property in the
center of the town has been selected
as the site for the new federal building
to be erected here. The price paid for
the site is \$7,000. Work on the build-
ing, for which the last congress appro-
priated \$60,000 will probably be begun
in the spring. The building will include
the customhouse, postoffice and Chinese
detention station. An effort will be
made at the conference session of Con-
gress to secure an additional appropriation
of \$40,000 for the structure.

The McDuffee's Record.

Considering the fact that more than
half of the voters of the country cast a
ballot for W. H. Taft last Tuesday it
does not strike one as strange that Hon.
H. C. McDuffee of Bradford should have
done so. But there is an interesting
fact in his history at Londonderry, N. H.,
cast his vote for George Washington
at the first presidential election.

The elder McDuffee voted at every
presidential election to and including
that of 1849, his death occurred before
the election of 1852. But his son,
Henry C. McDuffee, cast his first vote
and has never missed a presidential
election since.

In his active years Mr. McDuffee was
a leader in local politics and still takes
a keen interest in the campaign. He
is in good health and says he expects
to vote in the 1912 election.

It thus happens that a representative
of two generations of one family has
cast a vote at every presidential elec-
tion of the country.

North Troy Man Disappears.

A mysterious disappearance occur-
ed in North Troy Tuesday night, Nov-
ember 3, about 6:30 o'clock, when Er-
ick Drown, a well known resident,
stepped out of his dwelling and onto
the street, but has not been seen or
heard from by his friends since. Mr.
Drown left his home with the remark
that he had a headache and would go
out and walk it off. Failing to return
during the evening in which he was
expected, his family, but no one has
seen the missing man since he left
home. The fields and woods have been
searched for a distance of two miles,
and communication with relatives liv-
ing out of town fails to shed light on
the mystery.

Mr. Drown's wife, who has been an
invalid for a long time, and for the
past year has required the greater part
of his time and care, is prostrated over
her husband's unexpected absence, and
has none with her two sons to the home
of Mrs. George Bolton, her sister. Mr.
Drown is about 35 years old, of slight
build, stooping figure, and pale com-
plexion.

Will Develop Water Power.

The Burlington Light & Power Co.,
will in the spring develop to its full
capacity the water power privileges at
Essex Junction at the Hunter & Shil-
land and the Brownell privileges of the
Winouski river.

The company acquired the property
in 1906. It will build a dam below the
present Hunter & Shilland dam of con-
crete and of the most substantial con-
struction. From it there will be a fall
of 75 feet. The large boulders in the
bed of the river above the Brownell dam
are to be removed, giving a free water
runway.

The height of the new dam will set
the water back as far as the iron bridge
on the Central Vermont railroad and this
storage basin will hold an immense
volume of water forming an attractive
lake.

A large power house will be con-
structed below the dam on the Essex
side of the river, near the site of the
present Brownell saw mill.

The recent protracted dry weather
incapacitated the water power of the
light and power company of the gorge
and the steam auxiliary has been in
use for several weeks.

Work on this big undertaking will
be begun early in the spring and rushed
rapidly to completion. It is expected
that the power will be ready to be uti-
lized before the winter of 1909 sets in.

J. J. Kennedy of 52 Broadway, New
York City, the well known consulting
engineer, has been entrusted with the
work which will be done under contract.

A SENSATIONAL BREAK.

American Tobacco Stock Drops Twenty
Seven Points.

New York, Nov. 10.—There was a
sensational break in American Tobacco
stock on the curb market yesterday,
following the adverse decision of the
United States circuit court at Satur-
day. That decision was announced af-
ter the close of the market, when Amer-
ican Tobacco was quoted at 375. Soon
after the opening yesterday the curb
was flooded with selling orders and
within the first 35 minutes the stock
had sold down to 348, a drop of 27
points as compared with Saturday's
closing prices.

During the first hour Tobacco com-
mon sold down to 343. The slump in
Tobacco shares, together with general
realizing caused considerable weakness
in stock early in the session. Later
the market rallied on new points of
strength.

Satisfaction Guaranteed

BANKER ENDS NINE-YEAR TERM.

Although Sixty-nine Years Old, Lewis
Warner Emerges from Prison
Looking Chipper.

Boston, Nov. 10.—Breathing the air of
freedom for the first time in nine years,
Lewis E. Warner walked briskly out
from the state prison at Charlestown
shortly before 9 a. m. yesterday, having
paid the penalty for working the Hamp-
shire County Savings Bank at North-
ampton, Mass., nearly ten years ago.
The charge was the misapplication of
\$50,000. Speculation was the cause of
Warner's downfall.

Warner left the prison entirely alone,
and, dodging a dozen newspaper men
and photographers, leaped into a car-
riage and was driven to the south sta-
tion, where he took a train for North-
ampton.

Despite his nine years behind prison
walls, the former bank official appeared
in excellent health and spirits. He was
attired in a black suit and a black hat,
and his prison pallor was hidden behind a
neatly trimmed beard and mustache,
both of which had become gray since he
entered prison. He was given the cus-
tomary \$5, in addition to a sum of mon-
ey which his daughter had sent him
several days ago.

Warner up to the time of his downfall,
ten years ago, was one of the leading
citizens of Northampton, and besides be-
ing president of the national bank and
treasurer of the savings institution, was
interested in several industries which
also suffered from his mismanagement.

Warner was sixty years old when sen-
tenced, but yesterday he did not appear
to be sixty-nine.

MAY SEPARATE THE RACES.

The School Law of the State of Ken-
tucky Upheld.

Washington, Nov. 10.—In deciding the
case of Berea college vs. the state of
Kentucky favorably to the state, the
supreme court of the United States yester-
day held that the states of the nation
may constitutionally legislate to prevent
the coeducation of the white and black
races. The case was instituted to test
the validity of the state law of 1891,
prohibiting white and black children
from attending the same schools. The
higher state court ruled that the white
and black races are naturally antagonis-
tic and that the enforced separation of
the children of the two is in the line of
the preservation of the peace. The opin-
ion of the supreme court was handed
down by Justice Brewer and affirmed the
finding of both the Kentucky circuit
court and the court of appeals. Justices
Harlan and Day dissented.

Watched Fifteen Years.

"For fifteen years I have watched the
working of Buckler's Arnica Salve; and
it has never failed to cure any sore,
boil, or burn to which it was ap-
plied. It has saved us many a doctor
bill," says A. F. Hardy of Essex Willing-
ton, Maine. 25c at Red Cross Pharmacy,
Rickett & Wells' drug store.

PIMPLES

"I tried all kinds of blood remedies which failed to
do me any good but I have found the right thing
in Buckler's Arnica Salve. It cures all skin
d
